

regardless of whether one is a Democrat or a Republican, these issues are important. But unfortunately, over the recent years, it has become just that, and it is so unfortunate, even today, that it has been raised in a partisan context.

□ 1715

It does, however, give us the opportunity, as Democrats, to celebrate our Democratic administration and all that it has done to fend off efforts to turn back the clock, if we look at what happened in 1995 when the Republicans actually allowed corporate lobbyists to draft attacks on environmental standards. Or when the Republicans passed bills that cut environmental funding by 25 percent, or what I really want to talk about for a minute is the regulatory reform bill that would have actually dismantled the food inspection program.

In my district lives a woman named Nancy Donley, who, because of her own personal tragic situation, that is, the death of her 6-year-old son Alex from eating meat poisoned with *E. Coli* bacteria, created an organization. She turned her tragedy into an organization that will now fight to make sure that no other children die called STOP, Safe Tables Our Priority.

As a result of working with this administration, and in particular Vice President AL GORE, the food safety initiative was adopted. They were able to defeat the so-called regulatory reform which would have dismantled the meat and poultry inspection system in this Nation, and actually pass new regulations that began in 1998, more sophisticated ways of inspection.

That inspection program was really initiated in the Upton Sinclair days at the beginning of the century and really required updating, not dismantling. So we now have a more sophisticated system that is being phased in over time. It began in 1998, and the establishment of a food safety initiative.

As part of that initiative I know that Nancy had, Nancy Donley, had Vice President AL GORE, at the announcement of what we call PulseNet, which is a new program that we have to track food-borne illness outbreaks over the Internet, so we are now able to link an outbreak of food poisoning in Maine with one that might happen in Montana, and be able to see that it is from the same cause.

In fact, there was a terrible outbreak of *Listeria*, which is a virulent form of foodborne illness, deli food, soft cheeses, et cetera, last year that resulted in major recalls across the country of those foods, and has already proven itself to save lives.

At the announcement of PulseNet, our Vice President, AL GORE, was there to talk about it as an initiative that would save lives. As we know, he has been the person who has figured out how to use the most high-tech systems to bring them down to protecting families and now protecting our food supply.

So as we look forward to Earth Day this year and we look forward to the 21st century, I think we can be happy that we have someone who has been our point person on the environment, who has been an advocate and a fighter, and has implemented already those programs that will make our air, our water, and our world safer for our families.

Mr. PALLONE. I want to thank the gentlewoman. Mr. Speaker, I yield to the gentleman from New York (Mr. HINCHEY).

Mr. HINCHEY. Mr. Speaker, I thank the gentleman for yielding to me.

Last year when the appropriation bills were folded into an omnibus bill, the majority here added a long list of anti-environmental riders. They could not get those proposals through on their own merits, but they tried to hold funding for all Federal programs and services hostage to those riders. They figured that their opponents in Congress would be forced to swallow them, and that the President would agree to accept them to keep other programs operating.

But the President did not accept them. He insisted that they be taken out of the appropriations bill before he would sign it. That surprised the people who wrote the riders.

The factor they did not count on in their strategy was the Vice President of the United States, AL GORE. The President relies on AL GORE for advice on environmental matters, and it was AL GORE who said no, we cannot allow these things to happen. We have to take a stand. We have to take a stand, so that the riders faded away.

Let me give some examples of what AL GORE would not allow. He said no to proposals that would have blocked the EPA from conducting research or educational activities on global warming, a gag rule to block even a discussion of what may be the most serious environmental problem of our time.

He said no to a proposal that would have blocked clean-up of toxic PCBs, even in places where children could be affected.

The Vice President said no to proposals that would have blocked the EPA from reducing children's exposure to pesticides, and we now know that pesticides pose a much greater risk to children than they do to others, much more than we thought.

He said no to proposals that would have canceled environmental reviews on timber sales, where logging could threaten wildlife. He said no to a proposal to build a road through the middle of a migratory bird refuge, a place that is supposed to be wilderness.

He said no to proposals that would have required uneconomical logging that would have permanent damage to one of our most pristine forests. He said no to proposals that would have barred EPA from trying to improve air quality in our national parks. Because AL GORE took a firm stand, those proposals were blocked.

He has stood with us when we blocked efforts to roll back 25 years of work on cleaning up our rivers. He stood with us when we blocked efforts that would have prohibited EPA from doing more to clean up the air that we all breathe.

He stood with us on protecting children's health from asthma caused by airborne pollution, illness caused by food poisoning, and pesticide poisoning, permanent damage caused by toxic wastes let loose in the environment. The Vice President stood with us on all those issues.

The American people want clean air and water. They want freedom from pollution and contamination. They want protection of our beautiful public lands and forests, and they want protection for our wildlife. AL GORE wants them, too, and he wants all of them to have them as well. He is willing to stand up and fight for it to see that they get it.

He has been a very big help by having the courage to say no and to mean it. I am looking forward to seeing what he can do when he gets the opportunity to say yes.

Mr. PALLONE. Mr. Speaker, I want to thank the gentleman, and everyone who participated in this special order this evening. It is the eve of Earth Day. Earth Day is tomorrow. I think there is a lot of talk up here about what the truth is.

The truth is that the health of our environment is in jeopardy at the hands of the Republican majority in the Congress. The truth is that the Democrats and the Clinton-Gore administration are the true protectors of the environment for this Earth Day and the Earth Days in the future.

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. BASS). The Chair will remind all Members to address their remarks to the Chair, and not to refer to residents of the gallery.

Members should also not make personal references to Members of the Senate.

#### A TRIBUTE TO MAYOR RALPH J. PERK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. LATOURETTE) is recognized for 5 minutes.

Mr. LATOURETTE. Mr. Speaker, tonight Cleveland, Ohio, is much poorer than it was yesterday because of the passing of Mayor Ralph J. Perk. If we were to ask residents of the city of Cleveland about et cetera city's recent history, they might point us to the bridge at State Route 21 over the Cuyahoga River as the point where 25 years ago the Cuyahoga River caught on fire, or they might direct us to the factory where Mayor Perk, while attempting to show some blue collar voters that he
